### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

**Note:** The election received 6/10/05 has been acknowledged wherein Applicant elected Group II, claims 9-13, 16-20, 23-27, and 30-34 with traverse, however, upon further review Group II contains multiple species, and as a such a new restriction requirement is hereby set forth.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, 14, 15, 21, 22, 28 and 29, drawn to a method for connecting a plastic pipe to another plastic part, classified in class 29, subclass 428.
  - II. Claims 9-13, 16-20, 23-27, and 30-34, drawn to composite parts, classified respectively in classes 138 and 623.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by another and materially different process such as by casting.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3726

4. If Applicant elects either Group I or Group II, then Applicant is further required to elect only one species within the Group selected below for examination. Group I includes Species A, B, and C. Group II includes Species D, E, and F.

5. This application contains claims directed to the following patentably distinct species of the claimed invention: **Species A**, directed to method for connecting a plastic pipe to another plastic part by sheathing, and corresponding to claims 1-8; **Species B**, directed to a method for connecting a plastic pipe to another plastic part by molding an additional adaptor of a material transmissive to laser light together with the other plastic part, and corresponding to claims 14, 15, 21 and 22; **Species C**, directed to a method for connecting a plastic pipe to another plastic part by molding the other plastic part onto an adaptor of a plastic transmissive to laser light, and corresponding to claims 28 and 29; **Species D**, drawn to a motor vehicle pipeline, and corresponding to claims 9, 10, 13, 16, 17, 20, 23, 24, 27, 30, 31, and 34; **Species E**, drawn to a gas transport line, and corresponding to claims 9, 11, 16, 18, 23, 25, 30, and 32; **Species F**, drawn to a medical device, and corresponding to claims 9, 12, 16, 19, 23, 26, 30, and 33.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
